**Muslim - West**  
Facts Initiative

A partnership of The Gallup Organization  
and the Coexist Foundation

# www.MuslimWestFacts.com

www.MuslimWestFacts.com shares findings and analysis by The Gallup Organization of its ongoing public opinion research to inform the dialogue about Muslims and the West. This website represents an initiative by The Gallup Organization ([www.gallup.com](http://www.gallup.com)) and the Coexist Foundation ([www.coexistfoundation.net](http://www.coexistfoundation.net)) to share the views of the world's Muslim populations and the West globally with world leaders.

As part of its independently-funded World Poll, The Gallup Organization – a world leader in global opinion research - will collect and analyze public opinion data throughout the world's Muslim populations and the West for the next decade and beyond. Topics on Muslims and the West include people's beliefs about education, religion, culture, and democracy. Reflected in its world-wide independent study, is Gallup's historical commitment to the principle that accurate collection and dissemination of the opinions and aspirations of persons around the globe is vital to an informed understanding of the world in which we live.

The Coexist Foundation, a UK registered charity, has a mission to promote better understanding between members of the Abrahamic faiths and also their relations with other religions and the secular world through education, dialogue and research.

## Muslim - West Facts Initiative

To expand the audience of Gallup's independent research and analysis, The Gallup Organization and the Coexist Foundation have developed a partnership with the purpose of disseminating Gallup's work among world leaders to inform their dialogues with a set of facts - the collective views of the world's Muslim populations and the West. The project is called, "The Muslim-West Facts Initiative". The aim is to equip leaders with analysis based on empirical data as source of information that is alternative to popular assumptions or misperceptions.

Gallup's research provides an evidence-based starting point for conversations among opinion leaders world wide, which may contribute to more-informed conversations, debate, decision-making or better understanding between people of different faiths or cultures. It is hoped the website will be interested and useful, and your feedback is welcomed.
